Subject Index of Volume 51

Active centres
  catalytically, of oxides in double bond shift of olefins; composition of, 295
Addition
  IR study of surface species present on zeolite catalysts in some simple addition reactions, 329
Adsorption
  of propene in zeolites possessing sites of different adsorption energies, 341
  and surface reactions of pyridine on pure and doped ceria catalysts as studied by IR spectroscopy, 209
Alcohol
  aryl iodoalcohols and aryl iodoamines; Pd-catalyzed carbonylation of; formation of cyclic mono- or dicarbonylation products, 145
  dehydrogenase and hydrogenase; regeneration of NADH and ketone hydrogenation by hydrogen with combination of, 35
  phenol; β-cyclodextrin-catalyzed *para*-oriented hydroxymethylation of; selective syntheses using cyclodextrins as catalysts, 137
  2-propanol; catalytic reduction of nitrobenzene by hydrogen transfer from, 67
Alkanes
  alkylcyclopentanes; reactions of, over Pt catalysts, 261
  cyclohexane and ascorbic acid; thermodynamics of oxidation of, by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2; thermodynamics of homogeneous oxidations, 171
  methylcyclopentane:
    hydrogen pretreatment effects on hydrogenolysis of, on Pt/SiO_2 and Pt/Al_2O_3 catalysts, 247
    reactions of, on Pt/Al_2O_3 and $Sn–Pt/Al_2O_3$ catalysts, 279
Alkenes, Olefins
  composition of catalytically active centeres of oxides in double bond shift of, 295
  diazadienes as control ligands in homogeneous catalysis; diazadiene-iron(0) catalyzed synthesis of tetracyclononenes from norbornadiene and internal alkynes, 53
  2-methyl-1-butene; isomerization of, on Cu-on-silica catalysts prepared by ion exchange, 361
  olefin hydrogenation reactions; role of cooperative effects in polymeric Rh(I) bis-4,4′-diisocyanobiphenyl chloride catalysts in, 117
  propene:
    adsorption of, in zeolites possessing sites of different adsorption energies, 341
    selective ammoxidation of, over promoted Sn–Sb mixed oxide catalysts, 303
  propylene dimerization over silica-supported Ni(I) complexes: electronic and steric effects of trialkylphosphine ligand, 95
  silica-supported propylene dimerization catalysts: Ni(I) trialkylphosphine complexes; preparation and characterization of, 73
Alkynes
  internal, and norbornadiene; diazadiene-iron(0) catalyzed synthesis of tetracyclononenes from; diazadienes as control ligands in homogeneous catalysis, 53
Alloys
  amorphous Fe-based; catalytic hydrogenation of CO over, 223
Aluminium
  hydrogen pretreatment effects on hydrogenolysis of methylcyclopentane on Pt/SiO_2 and Pt/Al_2O_3 catalysts, 247
  reactions of methylcyclopentane on Pt/Al_2O_3 and $Sn–Pt/Al_2O_3$ catalysts, 279

© Elsevier Sequoia/Printed in The Netherlands

Ammoxidation
of methylnaphthalene by Cu,H-ZSM-5: further evidence for selective external-surface catalytic activity of zeolites, L1
selective, of propene over promoted Sn–Sb mixed oxide catalysts, 303
Antimony
selective ammoxidation of propene over promoted Sn–Sb mixed oxide catalysts, 303
Aromatic compounds
adsorption and surface reactions of pyridine on pure and doped ceria catalysts as studied by IR spectroscopy, 209
ammoxidation of methylnaphthalene by Cu,H-ZSM-5: further evidence for selective external-surface catalytic activity of zeolites, L1
bimetallic activation in homogeneous catalysis; formation of α-oxo amide by Pd-catalyzed double carbonylation of tricarbonyl (chlorobenzene) chromium complex, L15
catalysis by microporous heteropoly oxometalates: conversion of 1-methyl-2-ethylbenzene, 193
catalytic reduction of nitrobenzene by hydrogen transfer from 2-propanol, 67
heteroligand peroxo compounds, new, of Ti(IV): synthesis, characterization and spectroscopic studies of $A_2[Ti(O_2)_2SO_4]\cdot 4H_2O$ (A = NH_4 or K), $[Ti(O_2)_2(L{-}L)]$ (L–L = 1,10-phenanthroline, 2,2′-bipyridine) and $[Ti(O_2)_2(\text{thiourea})]\cdot H_2O$, 59
metal ion promoted oxidation of methyl group of 2,3-dihydro-2,2,4-trimethyl-1H-1,5-benzodiazepine, 155
Pd-catalyzed carbonylation of aryl iodoalcohols and aryl iodoamines: formation of cyclic mono- or dicarbonylation products, 145
polymer-bound thiamine models: kinetics of thiazolium salt catalyzed benzoin formation, 1
polymer effects on catalytic activity of macroreticular polystyrene-bound thiazolium salt in benzoin condensation reaction, 13
role of cooperative effects in polymeric Rh(I) bis-4,4′-diisocyanobiphenyl chloride catalysts in olefin hydrogenation reactions, 117
selective syntheses using cyclodextrins as catalysts; β-cyclodextrin-catalyzed *para*-oriented hydroxymethylation of phenol, 137
symmetry, orientation and surface chemistry of aromatic molecules on transition metal surfaces, 369
Ascorbic acid
thermodynamics of homogeneous oxidations; thermodynamics of oxidation of ascorbic acid and cyclohexane by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 171

Butylamine
n-; kinetic study of carbonylation of, using homogeneous water soluble Ru^{II}–EDTA–CO catalyst, 129

Carbon monoxide
activity and selectivity of CO hydrogenation catalyst prepared by supporting an Fe–Co bimetallic complex, L9
catalytic hydrogenation of, over amorphous Fe-based alloys, 223
formic acid and formaldehyde as spin-off products in Ru–EDTA–CO complex catalyzed liquid phase water–gas shift reaction, 161
kinetic study of carbonylation of n-butylamine using homogeneous water soluble Ru^{II}–EDTA–CO catalyst, 129
Carbonylation
kinetic study of, of n-butylamine using homogeneous water soluble Ru^{II}–EDTA–CO catalysts, 129
Pd-catalyzed, of aryl iodoalcohols and aryl iodoamines: formation of cyclic mono- or dicarbonylation products, 145
Pd-catalyzed double; formation of α-oxo amide by, of tricarbonyl (chlorobenzene) chromium complex; bimetallic activation in homogeneous catalysis, L15

Carbonyls
bimetallic activation in homogeneous catalysis; formation of α-oxo amide by Pd-catalyzed double carbonylation of tricarbonyl (chlorobenzene) chromium complex, L15
silica-supported osmium; molecular approach to hydrogen transfer reduction of ketones catalyzed by, 181
Cerium
adsorption and surface reactions of pyridine on pure and doped ceria catalysts as studied by IR spectroscopy, 209
Cholesteryl acetate
preparative catalytic β-stereospecific epoxidation of, by air in presence of ruthenium tetramesitylporphyrin: influence of catalyst: substrate ratio, 29
Chromium
bimetallic activation in homogeneous catalysis; formation of α-oxo amide by Pd-catalyzed double carbonylation of tricarbonyl (chlorobenzene) chromium complex, L15
Cobalt
activity and selectivity of CO hydrogenation catalyst prepared by supporting an Fe—Co bimetallic complex, L9
Condensation
polymer-bound thiamine models: polymer effects on catalytic activity of macroreticular polystyrene-bound thiazolium salt in benzoin condensation reaction, 13
Copper
ammoxidation of methylnaphthalene by Cu,H-ZSM-5: further evidence for selective external-surface catalytic activity of zeolites, L1
isomerization of 2-methyl-1-butene on Cu-on-silica catalysts prepared by ion exchange, 361
Cyanide
role of cooperative effects in polymeric Rh(I) bis-4,4′-diisocyanobiphenyl chloride catalysts in olefin hydrogenation reactions, 117
Cyclodextrins
selective syntheses using, as catalysts; β-cyclodextrin-catalyzed *para*-oriented hydroxymethylation of phenol, 137

Diazadienes
as control ligands in homogeneous catalysis; diazadiene-iron(0) catalyzed synthesis of tetracyclononenes from norbornadiene and internal alkynes, 53
Diazepine
metal ion promoted oxidation of methyl group of 2,3-dihydro-2,2,4-trimethyl-1H-1,5-benzodiazepine, 155
Dimerization
propylene, over silica-supported Ni(I) complexes: electronic and steric effects of trialkylphosphine ligand, 95
silica-supported propylene, catalysts: Ni(I) trialkylphosphine complexes; preparation and characterization of, 73

Electron microscopy
and structure–activity correlations of 'oriented' thin film catalysts, 347
Epoxidation
preparative catalytic β-stereospecific, of cholesteryl acetate by air in presence of ruthenium tetramesitylporphyrin: influence of catalyst: substrate ratio, 29

Films
electron microscopy and structure-activity correlations of 'oriented' thin film catalysts, 347
Formaldehyde
and formic acid as spin-off products in Ru—EDTA—CO complex catalyzed liquid phase water–gas shift reaction, 161
Formic acid
and formaldehyde as spin-off products in Ru—EDTA—CO complex catalyzed liquid phase water–gas shift reaction, 161

Hydrogen
catalytic reduction of nitrobenzene by hydrogen transfer from 2-propanol, 67

hydrogen pretreatment effects on hydrogenolysis of methylcyclopentane on Pt/SiO_2 and Pt/Al_2O_3 catalysts, 247
molecular approach to hydrogen transfer reduction of ketones catalyzed by silica-supported osmium carbonyls, 181
regeneration of NADH and ketone hydrogenation by, with combination of hydrogenase and alcohol dehydrogenase, 35
Hydrogenase
and alcohol dehydrogenase; regeneration of NADH and ketone hydrogenation by hydrogen with combination of, 35
Hydrogenation
catalytic, of CO over amorphous Fe-based alloys, 223
CO, catalyst prepared by supporting an Fe—Co bimetallic complex; activity and selectivity of, L9
olefin, reactions; role of cooperative effects in polymeric Rh(I) bis-4,4′-diisocyanobiphenyl chloride catalysts in, 117
regeneration of NADH and ketone hydrogenation by hydrogen with combination of hydrogenase and alcohol dehydrogenase, 35
Hydrogenolysis
hydrogen pretreatment effects on, of methylcyclopentane on Pt/SiO_2 and Pt/Al_2O_3 catalysts, 247
Hydrosilylation
intermediates in, of vinyltrichlorosilane catalyzed by palladium phosphine complexes, 41
Hydroxymethylation
β-cyclodextrin-catalyzed *para*-oriented, of phenol; selective syntheses using cyclodextrins as catalysts, 137

Iron
activity and selectivity of CO hydrogenation catalyst prepared by supporting an Fe—Co bimetallic complex, L9
catalytic hydrogenation of CO over amorphous Fe-based alloys, 223
diazadienes as control ligands in homogeneous catalysis; diazadiene-iron(0) catalyzed synthesis of tetracyclononenes from norbornadiene and internal alkynes, 53
Isomerization
of 2-methyl-1-butene on Cu-on-silica catalysts prepared by ion exchange, 361

Ketones
molecular approach to hydrogen transfer reduction of, catalyzed by silica-supported osmium carbonyls, 181
regeneration of NADH and ketone hydrogenation by hydrogen with combination of hydrogenase and alcohol dehydrogenase, 35

Microporous heteropoly oxometalates
catalysis by; conversion of 1-methyl-2-ethylbenzene, 193

NADH
regeneration of, and ketone hydrogenation by hydrogen with combination of hydrogenase and alcohol dehydrogenase, 35
Nickel
preparation and characterization of silica-supported propylene dimerization catalysts: Ni(I) trialkylphosphine complexes, 73
propylene dimerization over silica-supported Ni(I) complexes: electronic and steric effects of trialkylphosphine ligand, 95
Norbornadiene
and internal alkynes; diazadiene-iron(0) catalyzed synthesis of tetracyclononenes from; diazadienes as control ligands in homogeneous catalysis, 53

Olefins: see Alkenes
Osmium
silica-supported, carbonyls; molecular approach to hydrogen transfer reduction of ketones catalyzed by, 181
Oxidation
coordination chemical approach to catalytic, reactions, 285
homogeneous; thermodynamics of oxidation of ascorbic acid and cyclohexane by Ru(III) analogue of model peroxidase system: Ru(III)—EDTA—ascorbate—H_2O_2, 171

metal ion promoted, of methyl group of 2,3-dihydro-2,2,4-trimethyl-1H-1,5-benzodiazepine, 155
Oxometalates
microporous heteropoly; catalysis by; conversion of 1-methyl-2-ethylbenzene, 193

Palladium
bimetallic activation in homogeneous catalysis; formation of α-oxo amide by Pd-catalyzed double carbonylation of tricarbonyl (chlorobenzene) chromium complex, L15
intermediates in hydrosilylation of vinyltrichlorosilane catalyzed by palladium phosphine complexes, 41
Pd-catalyzed carbonylation of aryl iodoalcohols and aryl iodoamines: formation of cyclic mono- or dicarbonylation products, 145
Peroxidase system
thermodynamics of homogeneous oxidations; thermodynamics of oxidation of ascorbic acid and cyclohexane by Ru(III) analogue of model peroxidase system: Ru(III)—EDTA—ascorbate—H_2O_2, 171
Phosphorus
intermediates in hydrosilylation of vinyltrichlorosilane catalyzed by palladium phosphine complexes, 41
preparation and characterization of silica-supported propylene dimerization catalysts: Ni(I) trialkylphosphine complexes, 73
propylene dimerization over silica-supported Ni(I) complexes: electronic and steric effects of trialkylphosphine ligand, 95
Platinum
composition of surface sites on Pt catalyst, 239
hydrogen pretreatment effects on hydrogenolysis of methylcyclopentane on Pt/SiO_2 and Pt/Al_2O_3 catalyts, 247
reactions of alkylcyclopentanes over Pt catalysts, 261
reactions of methylcyclopentane on Pt/Al_2O_3 and $Sn–Pt/Al_2O_3$ catalysts, 279

Polymer
polymer-bound thiamine modes: kinetics of thiazolium salt catalyzed benzoin formation, 1
polymer effects on catalytic activity of macroreticular polystyrene-bound thiazolium salt in benzoin condensation reaction, 13
role of cooperative effects in polymeric Rh(I) bis-4,4′-diisocyanobiphenyl chloride catalysts in olefin hydrogenation reactions, 117
Porphyrin
preparative catalytic β-stereospecific epoxidation of cholesteryl acetate by air in presence of ruthenium tetramesitylporphyrin: influence of catalyst: substrate ratio, 29

Reduction
catalytic, of nitrobenzene by hydrogen transfer from 2-propanol, 67
hydrogen transfer, of ketones catalyzed by silica-supported osmium carbonyls; molecular approach to, 181
Rhodium
role of cooperative effects in polymeric Rh(I) bis-4,4′-diisocyanobiphenyl chloride catalysts in olefin hydrogenation reactions, 117
Ruthenium
formic acid and formaldehyde as spin-off products in Ru—EDTA—CO complex catalyzed liquid phase water–gas shift reaction, 161
kinetic study of carbonylation of n-butylamine using homogeneous water soluble Ru^{II}—EDTA—CO catalyst, 129
preparative catalytic β-stereospecific epoxidation of cholesteryl acetate by air in presence of ruthenium tetramesitylporphyrin: influence of catalyst: substrate ratio, 29
thermodynamics of homogeneous oxidations; thermodynamics of oxidation of ascorbic acid and cyclohexane by Ru(III) analogue of model peroxidase system: Ru(III)—EDTA—ascorbate—H_2O_2, 171

Silicon
Hydrogen pretreatment effects on hydrogenolysis of methylcyclopentane on Pt/SiO_2 and Pt/Al_2O_3 catalysts, 247
isomerization of 2-methyl-1-butene on Cu-on-silica catalysts prepared by ion exchange, 361
molecular approach to hydrogen transfer reduction of ketones catalyzed by silica-supported osmium carbonyls, 181
preparation and characterization of silica-supported propylene dimerization catalysts: Ni(I) trialkylphosphine complexes, 73
propylene dimerization over silica-supported Ni(I) complexes: electronic and steric effects of trialkylphosphine ligand, 95
Spectroscopy
adsorption and surface reactions of pyridine on pure and doped ceria catalysts as studied by IR spectroscopy, 209
heteroligand peroxo compounds, new, of Ti(IV): synthesis, characterization and spectroscopic studies of $A_2[Ti(O_2)_2SO_4]\cdot 4H_2O$ (A = NH_4 or K), $[Ti(O_2)_2(L{-}L)]$ (L—L = 1,10-phenanthroline, 2,2′-bipyridine) and $[Ti(O_2)_2(thiourea)]\cdot H_2O$, 59
IR study of surface species present on zeolite catalysts in some simple addition reactions, 329
surface chemistry of H-ZSM5 studied by time-resolved IR spectroscopy, 309
Surfaces
adsorption and surface reactions of pyridine on pure and doped ceria catalysts as studied by IR spectroscopy, 209
ammoxidation of methylnaphthalene by Cu,H-ZSM-5: further evidence for selective external-surface catalytic activity of zeolites, L1
composition of surface sites on Pt catalysts, 239
IR study of surface species present on zeolite catalysts in some simple addition reactions, 329
surface chemistry of H-ZSM5 studied by time-resolved IR spectroscopy, 309
symmetry, orientation and surface chemistry of aromatic molecules on transition metal surfaces, 369
Synthesis
and characterization and spectroscopic studies of $A_2[Ti(O_2)_2SO_4]\cdot 4H_2O$ (A = NH_4 or K), $[Ti(O_2)_2(L{-}L)]$ (L—L = 1,10-phenanthroline, 2,2′-bipyridine) and $[Ti(O_2)_2(thiourea)]\cdot H_2O$; new heteroligand peroxo compounds of Ti(IV), 59
diazadiene-iron(0) catalyzed, of tetracyclononenes from norbornadiene and internal alkynes; diazadienes as control ligands in homogeneous catalysis, 53
selective syntheses using cyclodextrins as catalysts; β-cyclodextrin-catalyzed *para*-oriented hydroxymethylation of phenol, 137

Tetracyclononenes
diazadiene-iron(0) catalyzed synthesis of, from norbornadiene and internal alkynes; diazadienes as control ligands in homogeneous catalysis, 53
Thermodynamics
of homogeneous oxidations; thermodynamics of oxidation of ascorbic acid and cyclohexane by Ru(III) analogue of model peroxidase system: Ru(III)—EDTA—ascorbate—H_2O_2, 171
Thiamine
polymer-bound, models:
kinetics of thiazolium salt catalyzed benzoin formation, 1
polymer effects on catalytic activity of macroreticular polystyrene-bound thiazolium salt in benzoin condensation reaction, 13
Thiourea
heteroligand peroxo compounds, new, of Ti(IV): synthesis, characterization and spectroscopic studies of $A_2[Ti(O_2)_2SO_4]\cdot 4H_2O$ (A = NH_4 or K), $[Ti(O_2)_2(L{-}L)]$ (L—L = 1,10-phenanthroline, 2,2′bipyridine) and $[Ti(O_2)_2(thiourea)]\cdot H_2O$, 59
Tin
reactions of methylcyclopentane on Pt/Al_2O_3 and $Sn{-}Pt/Al_2O_3$ catalysts, 279

selective ammoxidation of propene over promoted Sn–Sb mixed oxide catalysts, 303
Titanium
heteroligand peroxo compounds, new, of Ti(IV): synthesis, characterization and spectroscopic studies of $A_2[Ti(O_2)_2SO_4]\cdot 4H_2O$ (A = NH_4 or K), $[Ti(O_2)_2(L{-}L)]$ (L—L = 1,10-phenanthroline, 2,2′-bipyridine) and $[Ti(O_2)_2(thiourea)]\cdot H_2O$, 59
Transition metal surfaces
symmetry, orientation and surface chemistry of aromatic molecules on, 369

Vinyltrichlorosilane
intermediates in hydrosilylation of, catalyzed by palladium phosphine complexes, 41

Water
formic acid and formaldehyde as spin-off products in Ru—EDTA—CO complex catalyzed liquid phase water–gas shift reaction, 161
kinetic study of carbonylation of n-butylamine using homogeneous water soluble Ru^{II}—EDTA—CO catalysts, 129

Zeolites
adsorption of propene in, possessing sites of different adsorption energies, 341
ammoxidation of methylnaphthalene by Cu,H-ZSM-5: further evidence for selective external-surface catalytic activity of zeolites, L1
IR study of surface species present on zeolite catalysts in some simple addition reactions, 329
surface chemistry of H-ZSM5 studied by time-resolved IR spectroscopy, 309
